3rd Annual Summit on Intelligent Transport System “ Dream to Reality”

10th October 2018, Hotel The Claridges, New Delhi

Conference overview:

Road traffic congestion is a problem all over the world specially in India which is a fast growing economy, the problem is faced by almost all major cities of India. Intelligent Transport System (ITS) aims to achieve traffic efficiency by minimizing traffic problems. It enriches users with prior information about the traffic, local convenience real-time running information, seat availability etc. which reduces travel time as well as enhances their safety and comfort. ITS is a perfect method that provide solutions to different modes of traffic and transport management. As per the recent study report, the global intelligent transport system market to grow at CAGR of 8.70 % during 2017-21

Over the last five years, ITS Implementation have started helping in Indian cities and each city has its own hurdle for the ground zero installation for the intelligent system. Intelligent Transport System can save their time and make the city even smarter. The entire application of ITS is based on data collection, analysis and using the results of the analysis in the operations, control and research concepts for traffic management where location plays an important role.

In ITS “Dream to Reality” we focus on current implementation of ITS in different cities and their road safety & traffic management.

The aim of the conference is to explore possible ITS Implementation and opportunities in the smart cities and to provide solution to various road traffic control issues, aviation, railway & maritime.
